Consumers have changed towards digital businesses... ...Siemens drives digitalization for industry customers

1 Technical Drivers
Sensors, Connectivity, Bandwidth, Data Capturing and Storage, Clouds, Analytics, Knowledge generation...

2 Business Drivers
New Business Models, Ecosystem concept and Paradigm shift: From product-focused to user-centric mindset...

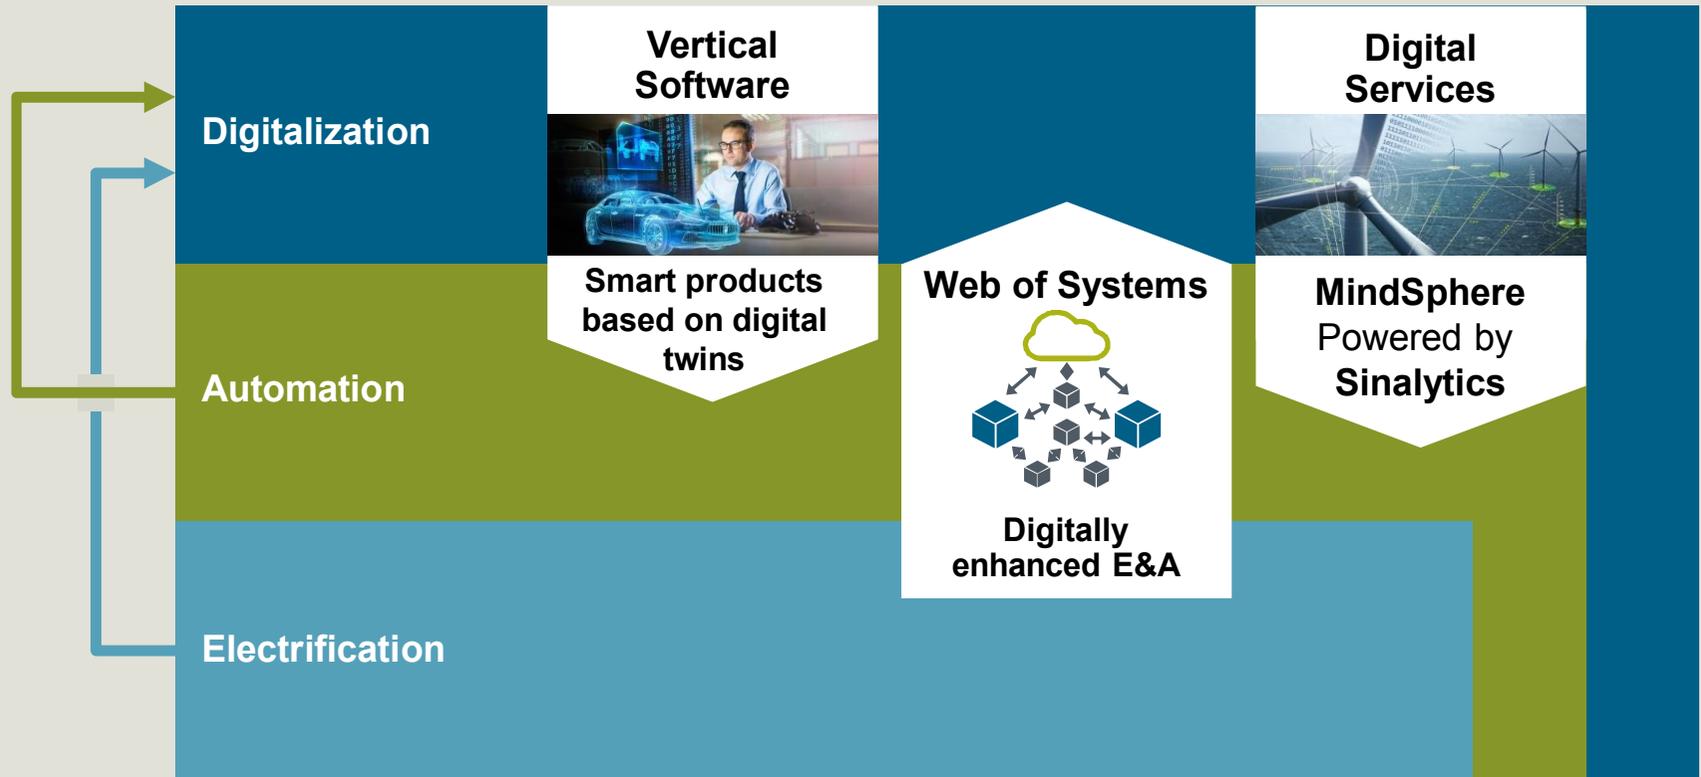

We see Digitalization in all our businesses

Siemens solutions combine Digitalization with Automation and Electrification

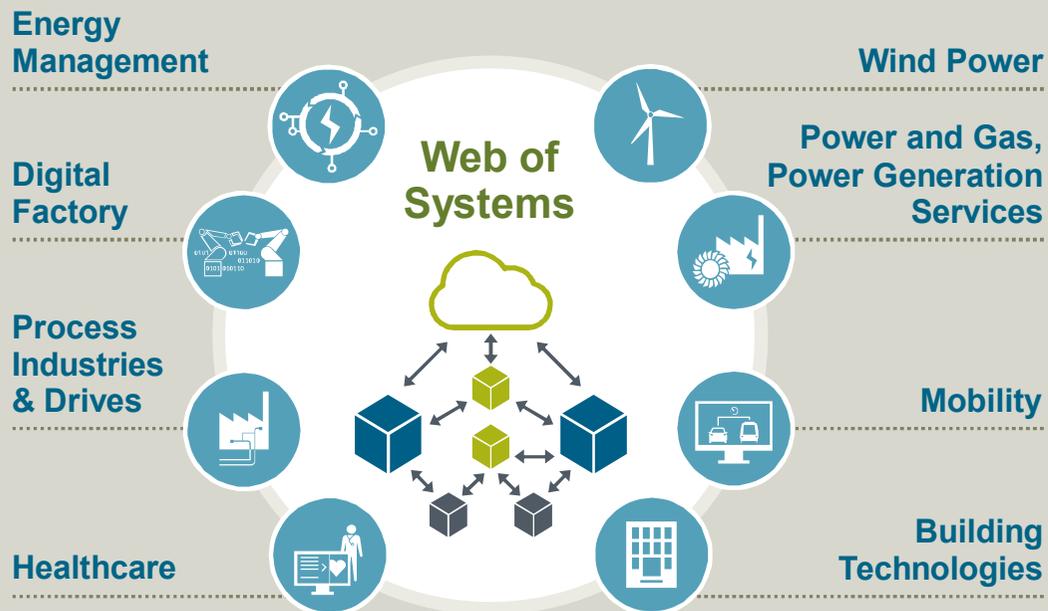

Domain and product know-how for Digitalization

Siemens leverages the Internet of Things to the needs of our customers in industry and infrastructure

Sinamics

SIEMENS

- + The Web of Systems puts devices, machines and their interactions in the center of digitally-networked industries
- + Devices process data locally and make decisions
- + Owners decide what happens with their data
- + Devices organize themselves and communicate with each other
- + New functionalities can be installed as with apps on smartphones
- + The installed base can be digitalized with the Web of Systems
- + Siemens delivers infrastructure and industry solutions characterized by:
 - **Reliability**
 - **Durability**
 - **Data security**

MindSphere powered by Sinalytics: Our new platform for data-based services

Productivity

Energy Management

Digital Factory

Process Industries & Drives

Healthcare

Availability

Energy efficiency

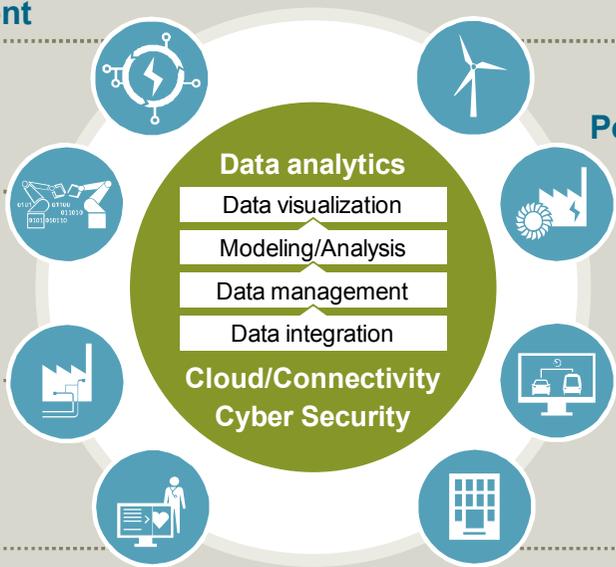

Wind Power

Power and Gas, Power Generation Services

Mobility

Building Technologies

Security

We build on common technology platforms ...

- + Latest technology for all Siemens businesses
- + Reduction of technical complexity in the company
- + Leveraging synergies through scaling
- + Faster development

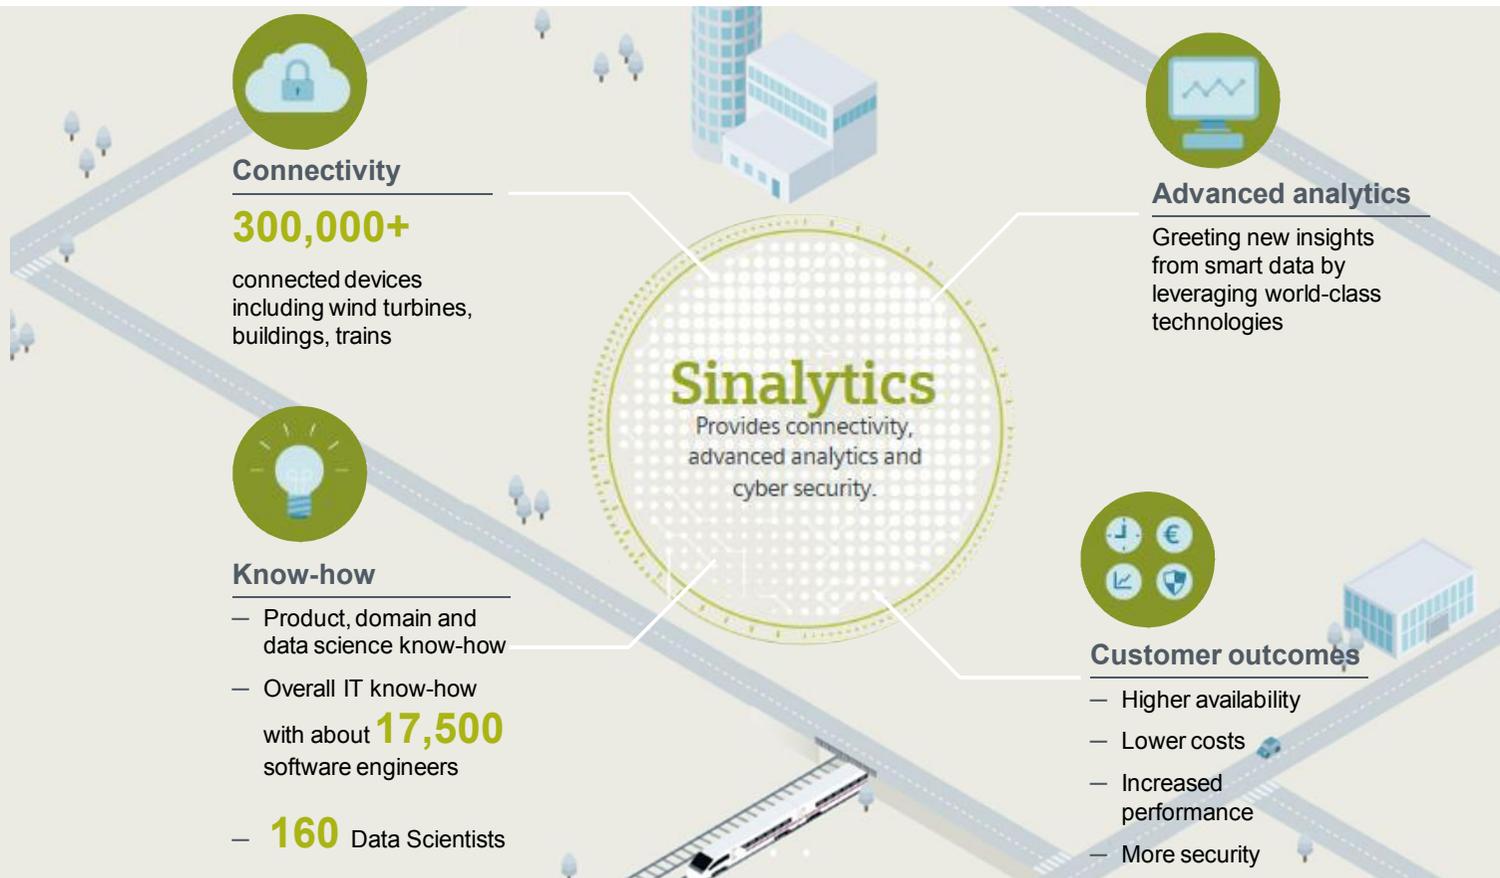

... and use the customer proximity of our operating units to develop applications

- + Know-how regarding large installed bases of products and systems
- + Deep know-how of customer processes and challenges
- + Many existing applications that already generate value for our customers

Mindsphere powered by Sinalytics is the driving force for Siemens Digital Services

SIEMENS

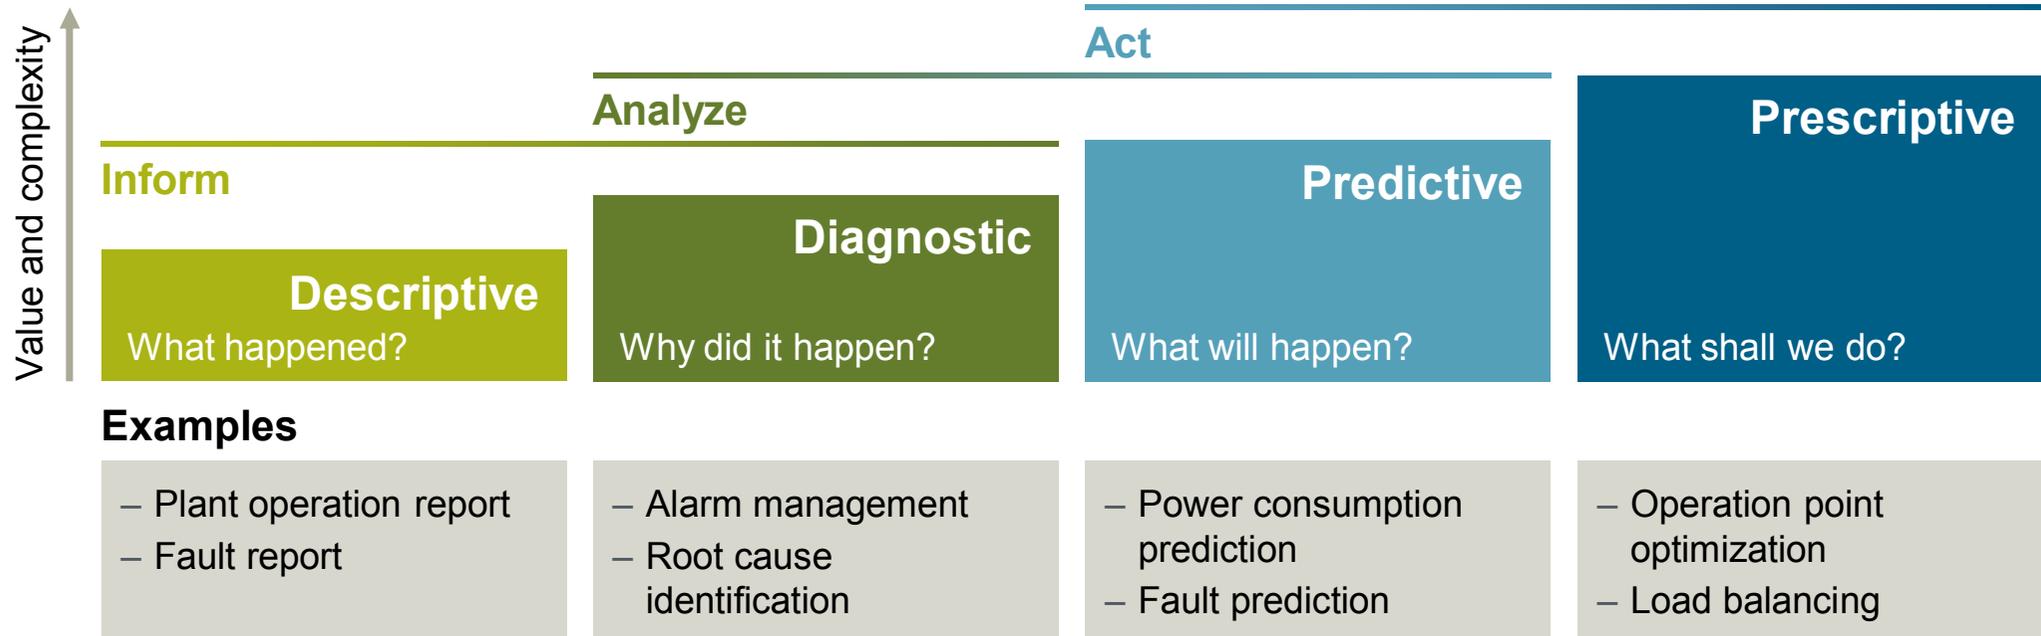

<https://www.youtube.com/watch?v=LXWhMcRXSwI>

- 26 high-speed trains at Renfe Spanish Rail Company (Madrid-Barcelona-Malaga)
- Performance contract with availability guarantee
- Passengers are reimbursed for delays >15 mins
- On-time rate of 99.9%
- 60% passengers switched from aircraft to train

Focus of data analytics is changing – From description of past to decision support

Current penetration across all industries (according to Gartner 2013)

99% Adopt by vast majority but not all data

30% Adopted by minorities

13% Still few adopters

3% Very few early adopters

Six step innovation approach "Smart Data to Business" turns data into customer & Siemens value

Six step innovation approach

"Smart data to business"

Technology

Business

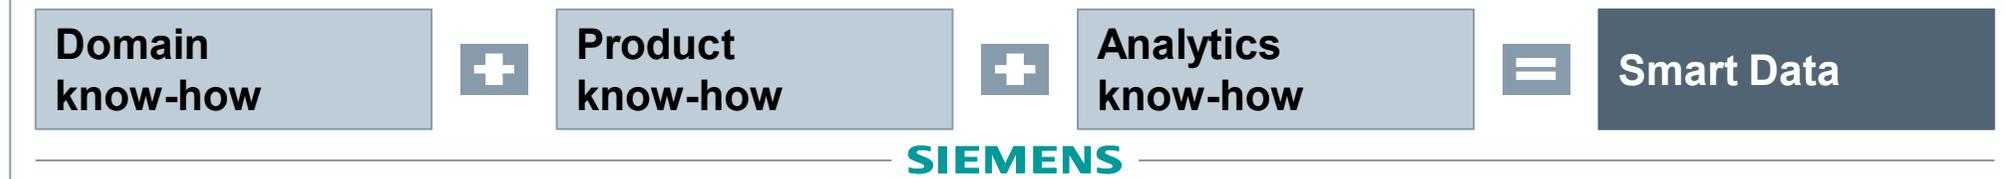

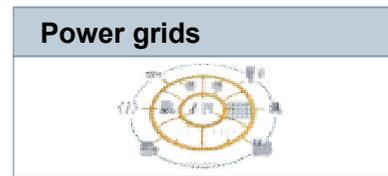

Customer

Benefits

- Customer value**
- Performance increase
 - Energy saving
 - Cost reduction
 - Risk avoidance/ security
- Siemens value**
- Product optimization
 - Process performance
 - Sales optimization

Smart data to business example: Smart City Research Aspern, Vienna

SIEMENS

Objective:

“My clear goal now is to become the greenest city in the world.”

Michael Häupl, Mayor of Vienna

City infrastructure

- Market drivers
- Customer needs
- Power networks
- Building technology

Smart Grid / Smart building

- Electrical engineering
- Power storage
- Smart meters

Smart City Cockpit

- Integration of smart grid, smart buildings, water and mobility
- Analytics dashboard
